Action Pad Configuration Guide

The e:cue Action Pad allows you to access a customised user interface for your lighting installation. It is accessible from any computer with a flash-enabled web browswer or via a free iOS/Android app.

Computer Access

1) Connect to the wireless network using the credentials provided

2) Open any flash-enabled web browser and type the following URL into the address bar: **http://192.168.123.1/ActionPad/ActionPad.html**
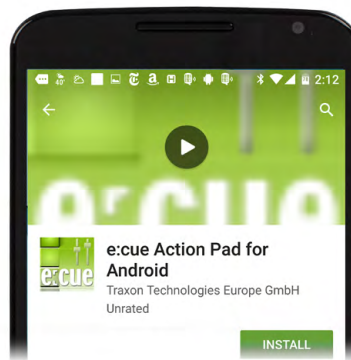

Mobile Access

The iOS/Android version of the app must be configured before first use. After the initial configuration, it will automatically open the interface when launched. Perform the following steps to configure the app.

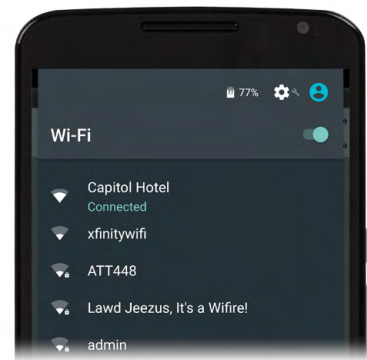

1

Search for "Action Pad" in your app store and choose the "e:cue Action Pad" option.

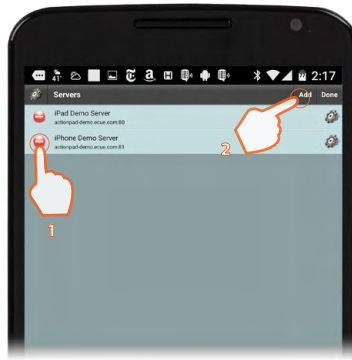

2

Install the app.

3

Connect to the wifi network using the credentials supplied to you.

4

Launch the app, then tap the "*Edit*" button in the top right corner

5

Delete the demo servers by tapping on the 🔴 button.

Then tap the "*Add*" button

6

Set the name to whatever you like.

Set the host to "192.168.123.1"

Then tap OK

7

Tap the "*Done*" button.

8

Tap on the server name.

9

The Action Pad should become visible and ready to use after a few seconds.

10

If you need to return to the configuration menu double tap on a blank area of the screen.

11

Tap on "*Disconnect*".
